DETAILED ACTION

1. The rejections set forth in the previous action; paper # 14 are withdrawn in view of the amendment on August 8, 2003.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1, 3-6, 8-13 are rejected under 35 U.S.C. 102(a) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over EP 0902322 (EP'322).

See the support containing protective layer (back surface) on pages 43-44 which contains polymer such as snowtex, and protective layer of the samples on page 49 wherein the protective layer contains gelatin or polymer latex. EP'322 also discloses a thermographic material having image-forming layer, protective layer and a backing layer. The polymer latex used as binder have glass transition temperature (T_g) whose preferred range differs among the protective layer, the backing layer and the image

forming layer. For the protective layer and the backing layer which are to come in contact with various equipment, polymer having a Tg of 25 °C to 100 °C are especially preferred from the standpoints of film strength and adhesion failure prevention. See abstract and page 4, paragraph [0028]. See also the preferred polymer in the protective layer and the back layer on page 4, paragraph [0032] and [0034]. The preferred polymers used in both protective layer and backing layer are different. The teaching of the use of the hydrophilic binder in the protective layer is disclosed on pages 4-5, paragraph [0035] to page [0036], and the use of latex in the outermost backing layer and the outermost backing layer is disclosed on page 5, paragraph [0041].

The material contains a common monomer less than 75 weight %. See the sample containing gelatin in the surface protective layer and containing the snowtex in the back layer. The back protective layer and the image protective layer contain 0. wt % which is within the scope of less than 75 wt% presented in the claimed invention. Therefore, the claimed invention lacks novelty. Alternatively, it would have been obvious to select the polymer taught in the EP'322 having glass transition of different temperature since the protective and the back layer come to contact at different equipment.

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 1752

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
